Pokemon Fire Red/Leaf Green: Static Reset

Soft reset static Pokemon until a shiny is found, including Legendary Pokemon, Snorlax, Hypno, Electrode etc.

Requirements

- **Serial Port:** Yes
- **Camera Device:** Yes
- **Audio Input:** Yes

Program Settings

- **Move Up instead of A Spam:**
Replaces A Spam with Up move, for Ho-Oh only
- **Seed Frame:**
Wait this many frames (not accurate) before pressing A at the title screen. This setting is changed by the program while running
- **Advance Frame:**
Wait this many frames (not accurate) before finishing dialogue after picking starter. This setting is changed by the program while running

Setup Instructions

1. Switch 2 user must disable all HDR settings, **Console Screen's HDR Output** and **HDR Output** below
2. Set Text Speed to Fast
3. Save in front of the static Pokemon, for Ho-Oh stand one tile below facing up

Expected Results

The programs starts by soft resetting with ABXY, delay by Seed Frame at title screen, delay by Advance Frame and triggers the encounter. For 1st battle it calibrates dialog delay, if the 2nd battle onward has larger delay then the Pokemon is shiny. Shiny sound detection is also enabled. If the Pokemon is not shiny the program increments Seed Frame or Advance Frame to check a different RNG permutation.
